M.Thrailkill.Architect LLC is a Portland-based architectural resources consultancy, providing specification writing, cost projection, product and materials research, and document review to architecture and interior design firms demanding a high level of collaborative design interaction.

We aim to produce the highest quality written specifications and cost projection, fully coordinated to our clients design intent and drawn documentation. Taking our commitment to the next level involves consistently doing more: Ensuring reference back to appropriate standards, maintaining consistency with code requirements, being aware of projects' design intents and engaging in on-going product and material exploration and research, all to be able to make educated recommendations to our clients.

The firm's three senior specifiers are all registered architects, contributing a broad range of experience from all aspects of architectural practice, and having worked on projects throughout the United States and in many countries around the world. Since its formation five years ago, the firm has been providing architectural resources and consulting to over forty architecture and interior design firms in Portland, Los Angeles, Miami, Orlando, New York City, Richmond, Salem, Seattle, and Vancouver BC, with an involvement to-date in over 160 projects and over 650 deliverable packages to-date.
