AIA No. 40736710)  
Construction Specifications Institute (CSI)  
(Member No. 2238498)

Tony is an architect intern in his second year producing architectural specifications and Project Manuals. He is driven to excellence, very detail oriented, and develops comprehensive tools to manage his work and ensure completeness and continuity. Tony has managed twelve projects for university, community college, public infrastructure, office and multi-family residential projects, and assisted on other projects for our clients.

Tony's strengths include his organization style, with which he proactively uses to collect and implement project information and ensure he meets owner standards and architect preferences, and his communication style, which is clear, concise and thorough. Tony's awareness allows him to address critical path matters before they can become a concern.

Tony's interests outside work are automobiles, traveling and cuisine. He recently traveled around Korea, visiting temples and savoring the food, drink and customs of that country. Tony is currently restoring a 1991 Nissan 240SX sports car.
