M.ThrailkillArchitect LLC is a Portland-based architectural resources consultancy, providing specification writing, cost projection, product & materials research, and document review to architecture firms demanding a high level of collaborative design interaction.

Our goal is to produce the highest quality architectural specifications, fully coordinated to our clients design intent and drawn documentation. Taking our commitment to the next level involves consistently doing more: Ensuring reference to appropriate standards, maintaining consistency with code requirements, remaining aware of projects' design intents and owner requirements, and engaging in on-going product and material exploration and research.

The firm's senior specifiers are registered architects, contributing a broad range of experience from all aspects of architectural practice, having worked on projects throughout the United States and in many countries around the world. Since its formation in 2014, the firm has provided architectural resources and consulting to over seventy architecture, planning, and interior design firms in the Pacific Northwest, California, Utah, New York, Virginia and Florida, with involvement to-date on more than 450 projects and providing over 1,400 deliverables.
