

<b>Position</b>	Specifications Assistant
<b>Similar</b>	Intern Architect, or professional or non-professional architecture graduate, with 3+ years architecture experience and on a path to licensure.
<b>About us</b>	M.Thrailkill.Architect is a dynamic and growing firm providing specification writing, product and materials research, and document review to architecture firms who desire a high level of collaborative, client interaction. Our design-centric mission is to provide architectural specifications and other project services. This involves regular collaborative design team engagement, which enlivens our consulting experience, strengthens and enriches our client relationships, and adds variety to our work experience.
<b>Job Summary</b>	We are looking for a highly collaborative, knowledgeable, and enthusiastic <b>Specifications Assistant</b> . The right applicant is passionate about contributing to our clients' design and documentation process while rapidly building technical knowledge and management skills at an engaging and diverse company involved with a broad variety of projects and clients. Our Specifications Assistants are intern architects and recent architecture graduates who develop an open and engaging rapport with our team, regularly meet with our clients (virtually and in-person), maintain a high level of quality control and consistency in our work, and act as willing collaborators, avid learners, and strong technical resources to the rest of our office.
<b>Why here?</b>	<p>We're involved in a much wider range of project types than most architecture firms, including multi-family housing and hospitality; primary, secondary and higher education; health care, laboratory and tech infrastructure; airport and train transportation; and civic and government projects. Very few firms are so broadly involved and working on so many projects.</p> <p>Our office is directly engaged in exploring, evaluating and implementing the highest levels of sustainability, working closely with others in our region, the most advanced in the country. The specifications we develop for our clients' projects lead the nation for healthy products, energy savings, environmental sensitivity, life-cycle assessment, and carbon capture.</p> <p>As a Specifications Assistant, you will meet directly with the project teams at our nationally known clients on a regular, often weekly, basis. Our clients' award-winning projects are located throughout the Pacific Northwest, as well as California, New York, Northern Virginia, South Florida and various overseas regions.</p> <p>We invest in our employees' lives and capabilities, with a very comprehensive benefits package and full support of training, testing, and accreditation for architecture licensure as well as many design and construction industry memberships and certifications, including AIA, NCARB, LEED and CSI.</p>
<b>Responsibilities</b>	<ul style="list-style-type: none"><li>• Preparing architectural specifications under the direction of our Specifications Writers in collaboration with our architect-clients' design teams; you will be working on five to ten projects simultaneously.</li><li>• Assisting with the review of clients' project drawings and other documents to coordinate product and material requirements, annotations and acronyms, including the incorporation of client-specific standards, you'll be directly involved in the specification production and editing process and the publishing of Project Manuals.</li><li>• Assisting with maintenance and improvement of our baseline specifications with the rest of our staff, including investigating best-practices, maximizing sustainability criteria, and improving coordination, you'll participate in the assessment, improvement and updating process first-hand alongside other staff.</li></ul>

**Compensation and Benefits**
